

## Towers Watson Releases New Data Validation Software Tool

July 30, 2015

### ***DataValidator will help insurers validate and transform their data more efficiently***

ARLINGTON, Va.--(BUSINESS WIRE)--Jul. 30, 2015-- Global professional services company Towers Watson (NASDAQ: TW) has introduced Towers Watson [DataValidator](#), a data validation and transformation software solution that helps insurers use their data more efficiently across financial modeling analytics, pricing applications and risk management.

"DataValidator allows insurers to streamline the production of their data for actuarial and risk analytics calculations," said Joel Fox, Towers Watson's global lead for Life Financial Modeling and Reporting. "The software solution is flexible, user-friendly and helps ensure high-quality data. This generates significant processing efficiency gains by capturing issues early in the process, thus avoiding unnecessary rework and manual adjustments."

DataValidator helps insurers meet evolving regulatory data quality requirements against today's increasingly challenging timetables. The solution provides a quick and comprehensive data quality assessment while providing thorough audit trails necessary for mandatory governance and audit readiness.

DataValidator is developed, maintained and supported by Towers Watson. It works with Towers Watson risk software products and third-party software solutions.
